ABSTRACT:

PROBLEM TO BE SOLVED: To provide a scholarship provision processing system for an assured member by which the rapid provision of scholarship is possible for the child of an assured person assured by life insurance, and also to provide its processing method.

SOLUTION: The system includes: a contract information storage means 3 for storing insurance contract information of the assured person; an input means 2 for inputting application information of death benefits, insurance proceeds in advanced injury or care insurance payments, and payments end information of the death benefits, the insurance proceeds in advanced injury or the care insurance payments; an arithmetic processing part 4 for retrieving the existence of a school child from the insurance contract information when the assured person dies, is disabled, or needs care, based on the one of the three kinds of application information or the one of the three kinds of payments end information which are inputted by the input means; and output parts 5, 6 for outputting at least the name and address of the child when the school child exists.
